

TICK HEALTH EDUCATION

SPRING & FALL

PREVENTION / AWARENESS / EDUCATION

FOR STUDENTS

Children ages 5-14 have the highest incidence of tick-borne diseases. Prevention education for this demographic group is essential to helping reduce the risk of disease contraction. LymeTV provides free tick bite prevention education in the form of an interactive animation curriculum, age-appropriate workbooks, in-person lesson plans, & additional educator & school nurse resources. These products & services are provided at no cost to schools, camps, & youth organizations.

WHAT THEY LEARN

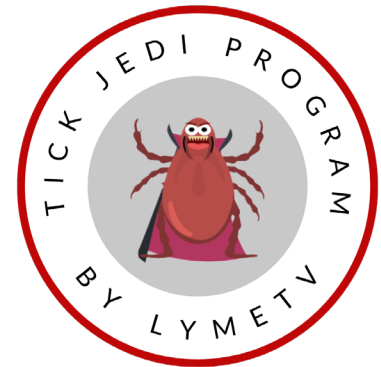

- What Is A Tick
- Dangers Of Ticks
- How Ticks Spread Disease
- Where Ticks Live
- Tick Prevention Measures
- Protective Clothing
- Correct Tick Removal
- What To Do After Bite

CAMPS/YOUTH ORGANIZATIONS

Providing education to youth ensures that children learn tick safety education as a life skill. There are many misconceptions about ticks & tick-borne diseases. Our program is free to camps & youth organizations, as well.

PARENTS/FACULTY

Educating adults ensures that children follow the best practices for prevention & also gives adults the knowledge they need to protect themselves & other family members. LymeTV can provide one-hour education sessions for adult groups between 15-75 people.

ABOUT US

LymeTV is a volunteer-based 501(c)(3) Maine registered non-profit organization dedicated to educating the global community about Lyme disease & other dangerous tick-borne infectious diseases located worldwide.
